Nizamabad, Telangana, India

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate skilled in building full-stack web applications with Python, Flask, MySQL, HTML and CSS, with a solid grasp of object-oriented programming, data structures, Git and Agile practices. Experienced in designing responsive user interfaces, database-driven backends and API integrations through hands-on projects such as a steganography tool, a news platform and a cafe website. Strong in debugging and problem-solving, with a collaborative approach to delivering reliable, user-focused software. Seeking an entry-level Custom Software Engineer / Python Developer role in a growth-oriented organization.

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Web Technologies: HTML5, CSS3
Frameworks: Flask
Database: MySQL
Tools & Platforms: Git, GitHub, VS Code

EDUCATION

JNTUH College of Engineering Sultanpur | 2022 – 2026
B.Tech in Computer Science and Engineering — CGPA: 7.65/10
Telangana State Model School and College | 2020 – 2022
Intermediate (12th) — 86.4%
Telangana State Model School | 2020
SSC (10th) — 100%

PROJECTS

Viyora Cafe - Cafe Website
- Built a cafe website with a Python Flask backend where customers can browse menu items and book a table online.
- Developed a "make your own coffee" feature that lets users choose ingredients to customize their drink.

StegoSafe - Secure Steganography Web Application
- Built a steganography web app to embed and extract hidden messages in images, audio, and video files.
- Implemented the backend with Python and Flask (OOP) and a MySQL database for secure data handling.
- Designed responsive encryption/decryption interfaces and applied LSB-based techniques to protect data confidentiality.

News Vista - Personalized News Platform
- Built a full-stack personalized news app in Python with live API integration.
- Developed user authentication, article saving, liking, and sharing using REST APIs and database integration.
- Added category-based news recommendations to improve user engagement.

College Complaint Registration System
- Designed a role-based complaint management system for students and administrators using Python and MySQL, enabling complaint tracking and resolution.
